X-One Speed: the cyclo-cross racer

Tuned entirely for speed, the new X-One Speed completes Schwalbe's One-Cross series with a new speed miracle.

Whether gravel or cyclo-cross – many ambitious road riders have always switched to cross bikes in winter. But now the fun of cyclo-cross is captivating increasing numbers of hobby and leisure cyclists all year round.

To meet the various demands on asphalt and woodland trails, for relaxed touring and competition, Schwalbe offers a cross range made up of X-One Allround, X-One Bite and the new X-One Speed. With its OneStar compound and low weight, it's designed entirely for speed. Its flat round dimples are supported by innovative multi-rib blocks, ensuring safe traction on dry tracks, with vertical outer studs providing stability when cornering. These features make the X-One Speed the fastest cross tyre in the product family for competition and ambitious riding on asphalt and dry off-road tracks.

The X-One Speed is available from specialist bicycle retailers in the Tubeless Easy with MicroSkin and OneStar compound versions as well as with RaceGuard and Dual compound in size 33-622 (28 x 1.3) at a cost of 59.90 euros and 38.90 euros (RaceGuard version) respectively.
