

## NEW - JOHNNY WATTS 365

# ARRIVE SAFELY – EVERY DAY

*JOHNNY WATTS 365 - THE MUD & SNOW TIRE FOR THE BIKE*

**Whether commuting to work, taking the kids to kindergarten or touring by bike: Bicycles are increasingly replacing second cars and are thus in use all year round - in all weathers. For this challenge, Schwalbe has once again developed the proven Johnny Watts SUV tire with a special new 365 version.**

Karin Warlast lives in the middle of Berlin and has tested the tire: „When our third child was born, the second car became too small. So, I switched to a S-pedelec and trailer and it works very well. Whether commuting to work, taking kids to kindergarten, or longer trips to Brandenburg by S-Bahn and bike. In the city we have many broken pieces of glass and everything from broken roads, cobblestones to rough gravel roads. Puncture protection and safety are therefore extremely important to me. And for winter, I don't want a tire change either.“

The new Johnny Watts 365 delivers the perfect tire solution for exactly these needs, everything revolves around safety:

- 365 - safety all year round - a stand-alone product line in the Schwalbe tire range.
- 15% more tread depth - improved grip off the road
- More open tread - for better interlocking on all surfaces, even slush
- Sipes on all lugs - improve grip in critical situations
- Extra tuned rubber compound - Addix 4 Season - safety for the most adverse temperatures. The tire retains its grippy properties even at the lowest temperatures down to - 20 degrees C
- For year-round safety - analogous to Auto M&S tires\* - compromises are made between rolling resistance and grip
- Puncture protection - the Johnny Watts 365 has

**JOHNNY WATTS 365**

very good Schwalbe puncture protection with Double Defense - against edges, potholes and shards

- Reflective stripes - added visibility for commuters and for the darker times of the year
- Saves time and effort - no need to change tires for the winter months

\*M&S stands for mud & snow.

## SCHWALBE TECHNOLOGIES

### DOUBLE DEFENSE:

The combined puncture protection is available in two versions for the Johnny Watts 365. In the folding tire version SnakeSkin (all around) and additional RaceGuard protect under the tread. In the wire bead version, GreenGuard protects under the tread and SnakeSkin on the sidewalls.

### ADDIX FOUR-SEASON-COMPOUND:

Extremely versatile rubber compound, specially adapted to conditions in year-round use. The tire retains its grippy properties even in the lowest temperatures down to - 20 degrees C.

### REFLEX STREIFEN:

The reflective stripes light up very brightly in headlights. Since they shine back in the direction of the headlight, you are very well seen and visible as a cyclist by the two tire-sized reflected light circles. For more safety in road traffic.

## SCHWALBE 365s

In addition to the Johnny Watts 365, there is also the Marathon 365, which replaces the Marathon GT 365 and also offers full grip and very good puncture protection in all seasons
