Press Release

05.09.2023

## ***New all-season training tire: Schwalbe One 365***

*Tire has been newly developed and replaces the Durano DD*

Change in the racing tire range of Schwalbe: Effective immediately, the One 365 replaces the Durano DD. The tire has been newly developed and puts even more emphasis on riding dynamics and safety in all seasons.

Its construction provides a much smoother and better riding experience on all training rides. At the same time, it retains the high puncture protection of its predecessor. The One 365 complements Schwalbe's 365 series of tires for the whole year.

### ***Dynamics & safety***

The Addix 4-Season Compound has a particularly low vitrification temperature and thus offers a lot of grip even at low temperatures, without negatively affecting the rolling resistance (at all temperatures). The result: a tire with dynamic riding characteristics throughout the year.

Thanks to the French Former Bead-to-Bead carcass construction, the One 365 has three continuous layers of carcass under the tread, in addition, the reinforced RaceGuard insert provides very high puncture protection. At the same time, the sidewall also offers excellent cut protection.

In addition, there is a design highlight: The One 365 is equipped with a black reflective strip. This ensures high visibility for late summer rides at dusk and in the dark season, without attracting attention in daylight (not ECE-R88 certified). The ONE 365 is perfect for sporty training rides in any season. It is available in sizes 25-622 (300g), 28-584 (320g) and 32-622 (355g) now.

## Available sizes

### FOLDING

ETRTO	COLOR	WEIGHT	EUR
25-622	Black+Blackreflex	300	51,90
28-622	Black+Blackreflex	320	51,90
30-622	Black+Blackreflex	355	51,90
